Presents

BUILDERS'
CONGRESS
2019

THEME:

**BIM AGENDA FOR THE NIGERIAN
CONSTRUCTION INDUSTRY**

ABOUT THE COUNCIL OF REGISTERED BUILDERS OF NIGERIA (CORBON)

The Council of Registered Builders of Nigeria (CORBON) was established through the Builders Registration, etc. Decree No. 45 of 1989, now Act Cap B. 13 LFN 2004. It is mandated to regulate and control the practice of building technology profession in all its aspects and ramifications.

Thus, by the provisions of the Act, CORBON is charged with the following responsibilities, among others:

- To determine who is Builder for the purpose of the Act;
- To determine what standards of knowledge and skills are to be attained by persons seeking to become registered as Builders and reviewing those standards, from time to time, as circumstances may permit;
- To secure, in accordance with the provisions of the Act, the establishment and maintenance of a register of persons entitled to practice the profession of building and to publish, from time to time the lists of those persons;
- To regulate and control the practice of the building technology profession in all its aspects and ramifications; and
- To perform such other functions conferred on the Council by the Act.

On the premise of the Act, CORBON has embarked on the following:

- ❖ Registration and licensing of Builders
- ❖ Registration and licensing of Building Consultancy firms
- ❖ Licensing of Building Trades Artisans and Craftsmen
- ❖ Licensing of Companies that are involved in Building Technology services. Builders by their education, training and skills are the PRODUCTION MANAGERS in building delivery. They manage the construction process from conception

to completion and handing over. This is based on the stipulation in Section 13.12.4 of the National Building Code which states that "The management of the execution of the building works including the supervision of artisans and tradesmen shall be carried out by a Registered Builder". The code defines Building work in Section 2.26 as follows: "Building works shall mean the erection, construction, alteration, extension, repairs, demolition and removal of a building or structure and shall include work in connection with material change of and/or improvement to a building".

THE BUILDERS

Pursuant to the provisions of the Act, the Council had determined that a Builder is a registered professional, who has the prescribed minimum academic training in the Science and Technology of Production, Maintenance, Rehabilitation of Buildings as accredited by the CORBON Council.

The National Building Code provides that the Builder should manage the production of buildings including the supervision of artisans & craftsmen. He is to produce the following documents to facilitate building project delivery:

- Program of works.
- Quality management plan.
- Health & safety plan.
- Construction methodology.

*To avoid quackery and building collapse,
engage professional builders*
